INTERNATIONAL AQUACULTURE WORKSHOP Environmental and Social Responsibility for Sustainable Aquaculture

Santo Tomas University, Chile
March 20-21, 2006

Dr. Al Castledine,

Director of Aquaculture Development for the British Columbia
Ministry of Agriculture and Lands

He received his doctorate degree in Biochemistry - Fish
Nutrition - from the University of Victoria in 1981.

Over the past 25 years he has worked in aquaculture
extension, research, policy development and industry
management for two provincial governments and the federal
Department of Fisheries and Oceans.

The challenge in British Columbia and elsewhere is to secure
benefits from aquaculture development by
providing appropriate governance based on sound science
while recognizing distinct social and environmental contexts.
