## **INTERNATIONAL AQUACULTURE WORKSHOP Environmental and Social Responsibility for Sustainable Aquaculture**

Santo Tomas University, Chile  
March 20-21, 2006

### **Dr. Barry Hargrave**

Senior scientist with the Canadian Department of Fisheries and Oceans (DFO), obtained his doctorate degree in aquatic ecology from the University of British Columbia in 1969.

His research over 35 years has involved national and international projects to assess potential negative effects of deep sea waste disposal, studies of long range transport of atmospheric pollutants to the Arctic Ocean and developing methods and models to determine far field effects of finfish and bivalve aquaculture.

The range of issues from open ocean to coastal areas reflects the breadth of DFO responsibilities for management of freshwater and marine aquatic resources.
