INTERNATIONAL AQUACULTURE WORKSHOP Environmental and Social Responsibility for Sustainable Aquaculture

Santo Tomas University, Chile
March 20-21, 2006

Dr. Jon Chamberlain

He is a research fellow with the Canadian Department of Fisheries and Oceans (DFO).

His research over the last 10 years in Scotland, Ireland and Canada has focused on developing modeling techniques and methodology to predict the environmental effects of aquaculture operations and their application within regulatory and management frameworks.

His research involving the waste sedimentation model DEPOMOD has significantly contributed to its application by the Scottish Environment Protection Agency and DFO Pacific Region as a management decision support tool.
